Daria Artyomenko

Frontend developer (React)

Motivated and passionate junior frontend developer seeking to leverage my skills in React to contribute to innovative projects and gain practical experience in the field.

Projects:

1. **Currencies and coins (React, SCSS)**
   - Project based on APIs - currencyapi and coinapi.
   - In this web application, you can find out the current exchange rates,
   - Convert currency in a modal window;
   - See the dynamics of currency changes over the period;
   - Switch the theme from dark to light and vice versa;
   - Acquainted with additional information about bank cards;
   - Utilized React Router for navigation.

2. **Marvel (React, SCSS)**
   - Integrated with the Marvel API to fetch and display information about various Marvel characters.
   - Implemented search functionality for users to easily find their favorite characters.
   - Designed a visually appealing interface with card components to showcase character details.
   - Utilized React Router for navigation

3. **Coffee-house (React, SCSS)**
   - Implemented a product filter using tabs and line search;
   - Utilized React Router for navigation between different pages.
   - In this web application, you can view the product card
